Washington, Mt. Kearsarge, and the Pleasant Mountains, with the Hotels on them. On the East is a beautiful scenery, including the City of Lewiston. On the South is a large Pine and Oak Grove within 300 feet of the House. This Hotel has 450 feet of broad piazza.

The Grand Trunk Railway

AND

RICHELIEU AND ONTARIO NAVIGATION

COMPANIES

Offer better inducements to tourists than ever before. THE GRAND TRUNK RAILWAY has been *RELAID WITH STEEL RAILS,* and has been equipped with New Locomotives and First-class Cars.

Pullman Palace Cars are run on all Express Trains.

The Grand Trunk Railway

Is the CHEAPEST AND BEST ROUTE between the East and West, as well as the

"GREAT PLEASURE ROUTE."

The improved condition of this great Through Line to all the principal pleasure resorts, has been acknowledged by its patrons as making it equal, in every respect, to the best in the country, yet it is still being improved, and will this year be in better condition than ever before. The Passenger Equipment is now fully equal to any other line. The Pullman Cars, which run on both Night and Day Trains, are new and of the improved pattern — with convenient Dressing-Rooms exclusively for Ladies. A new feature of the route will be the running of a Pullman Palace Car between Montreal and Chicago WITHOUT CHANGE — the disagreeable transfer between Port Huron and Sarnia no longer exists, as full trains now cross the St. Clair without passengers leaving their seats. There will be, by Pullman Car Passengers, but one change between Boston and Chicago, and that will be made at Montreal under covered depot, with very little inconvenience.

The International Bridge across the Niagara River is now complete, and opened for traffic: thus placing the Grand Trunk Railway prominently before the public as a first-class line between Boston, New York and Chicago. This division of the line, between Buffalo and Detroit, has an entire steel track; a complement of new passenger cars, combining every improvement for the comfort and convenience of the travelling public, necessitated by the change of gauge from 5 feet 6 inches to 4 feet 8½ inches, the gauge of the Michigan Central and New York Central Railways, in connection with which the Grand Trunk Railway will run.
